

## The Functional Listening Index-Paediatric® (FLI-P®) - Monitoring Listening Skills for Positive Progress

### Focus

Functional listening skills underpin language, literacy, communication development and social competence. How can we closely track functional auditory skill development from infancy?

The Functional Listening Index - Paediatric (FLI-P®) is a new research based tool designed to assist the tracking and monitoring of a child's listening skills in everyday life scenarios.

### Course details

- Two hour online interactive course for professionals working with young children with hearing loss.
- Multiple opportunities for group discussion of key concepts to support student learning.
- Participants will require access a computer/tablet with video and audio capabilities in order to join and interact throughout the course.

**Live, interactive and online**

**\$99 per person including GST**

**Wednesday 17th of August 2022  
11am - 1pm AEST**

### Learning Outcomes

Participants of this workshop will:

- Understand what is 'functional listening' and the importance of monitoring this for children with hearing loss
- Learn how to recognise functional listening skill development in young children
- Learn how to use the research based tool - the Functional Listening Index-Paediatric® to track listening skill attainment
- Learn strategies to facilitate the development of functional listening skills in children

### Accreditation

Completing “The Functional Listening Index-Paediatric (FLI-P®): Monitoring Listening Skills for Positive Progress” may contribute 2 hours of TQI accredited PL addressing Standard Descriptors 1.1.2, 1.2.2, 1.6.2, 3.2.2, 3.4.2, 3.7.2, 5.1.2, 5.3.2, 6.3.2, 6.4.2 and 2 hours of NSW Education Standards Authority (NESA) Elective PL.

Completing “Functional Listening Index-Paediatric (FLI-P®): Monitoring Listening Skills for Positive Progress” can contribute 2 hours of NSW Education Standards Authority (NESA) Elective PD.
